

MetroCar App:

Driving User Engagement

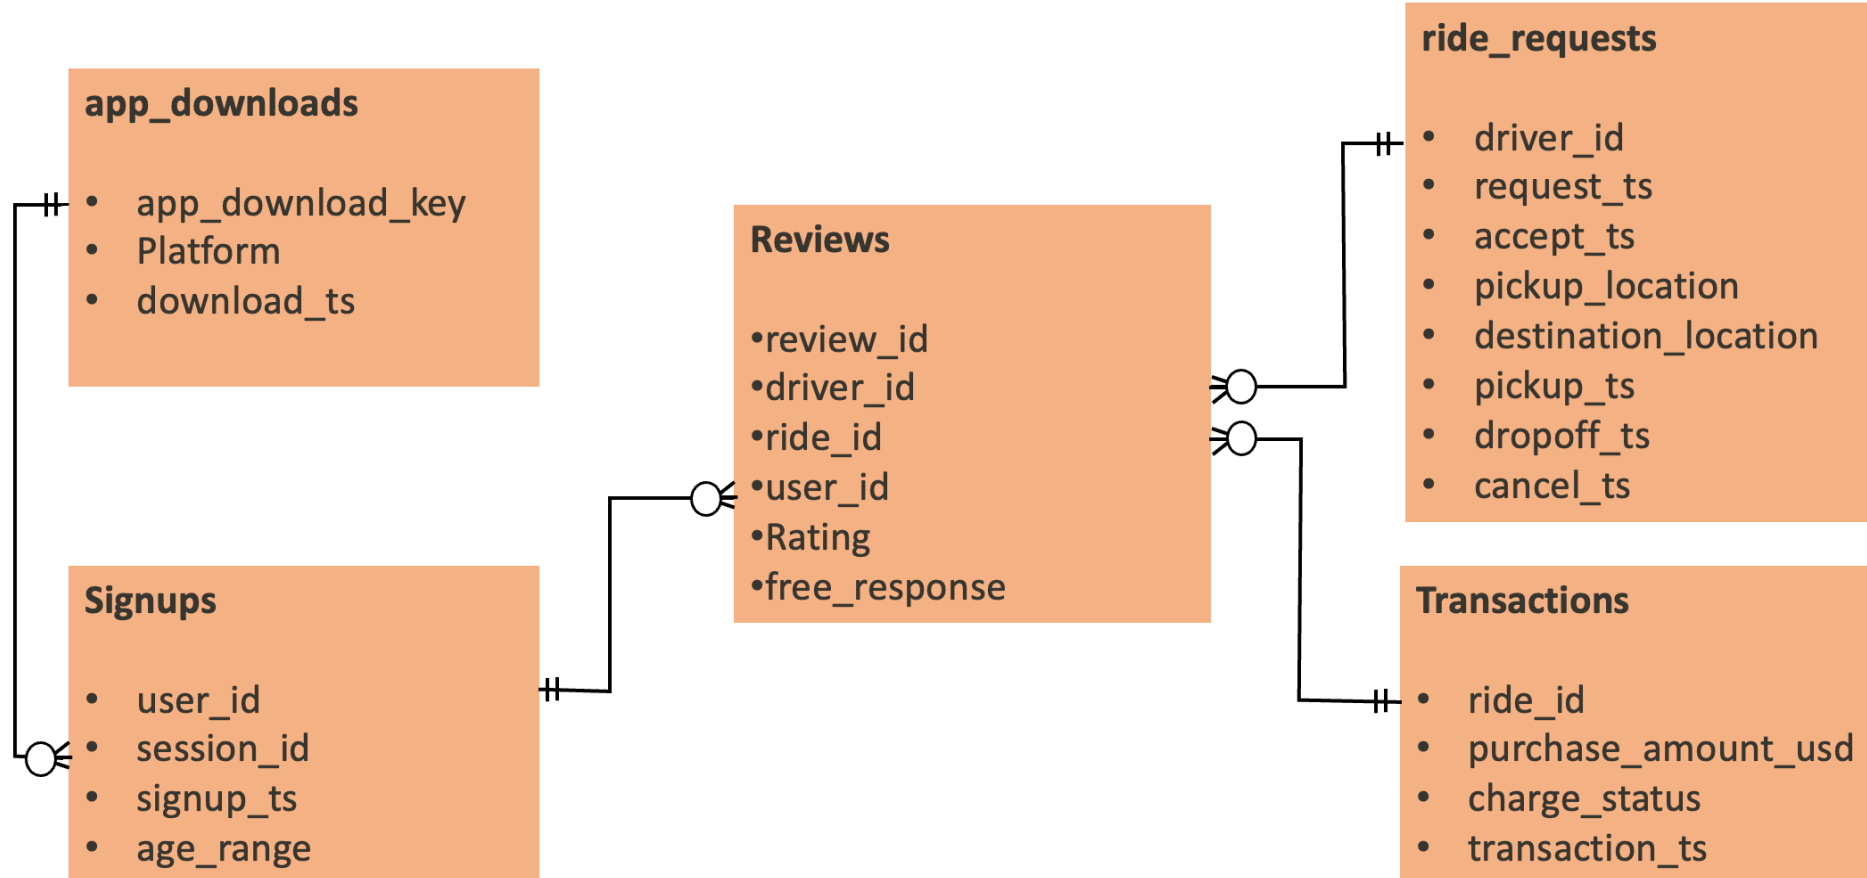

metrocar

Created By :

Simin Jahankhah

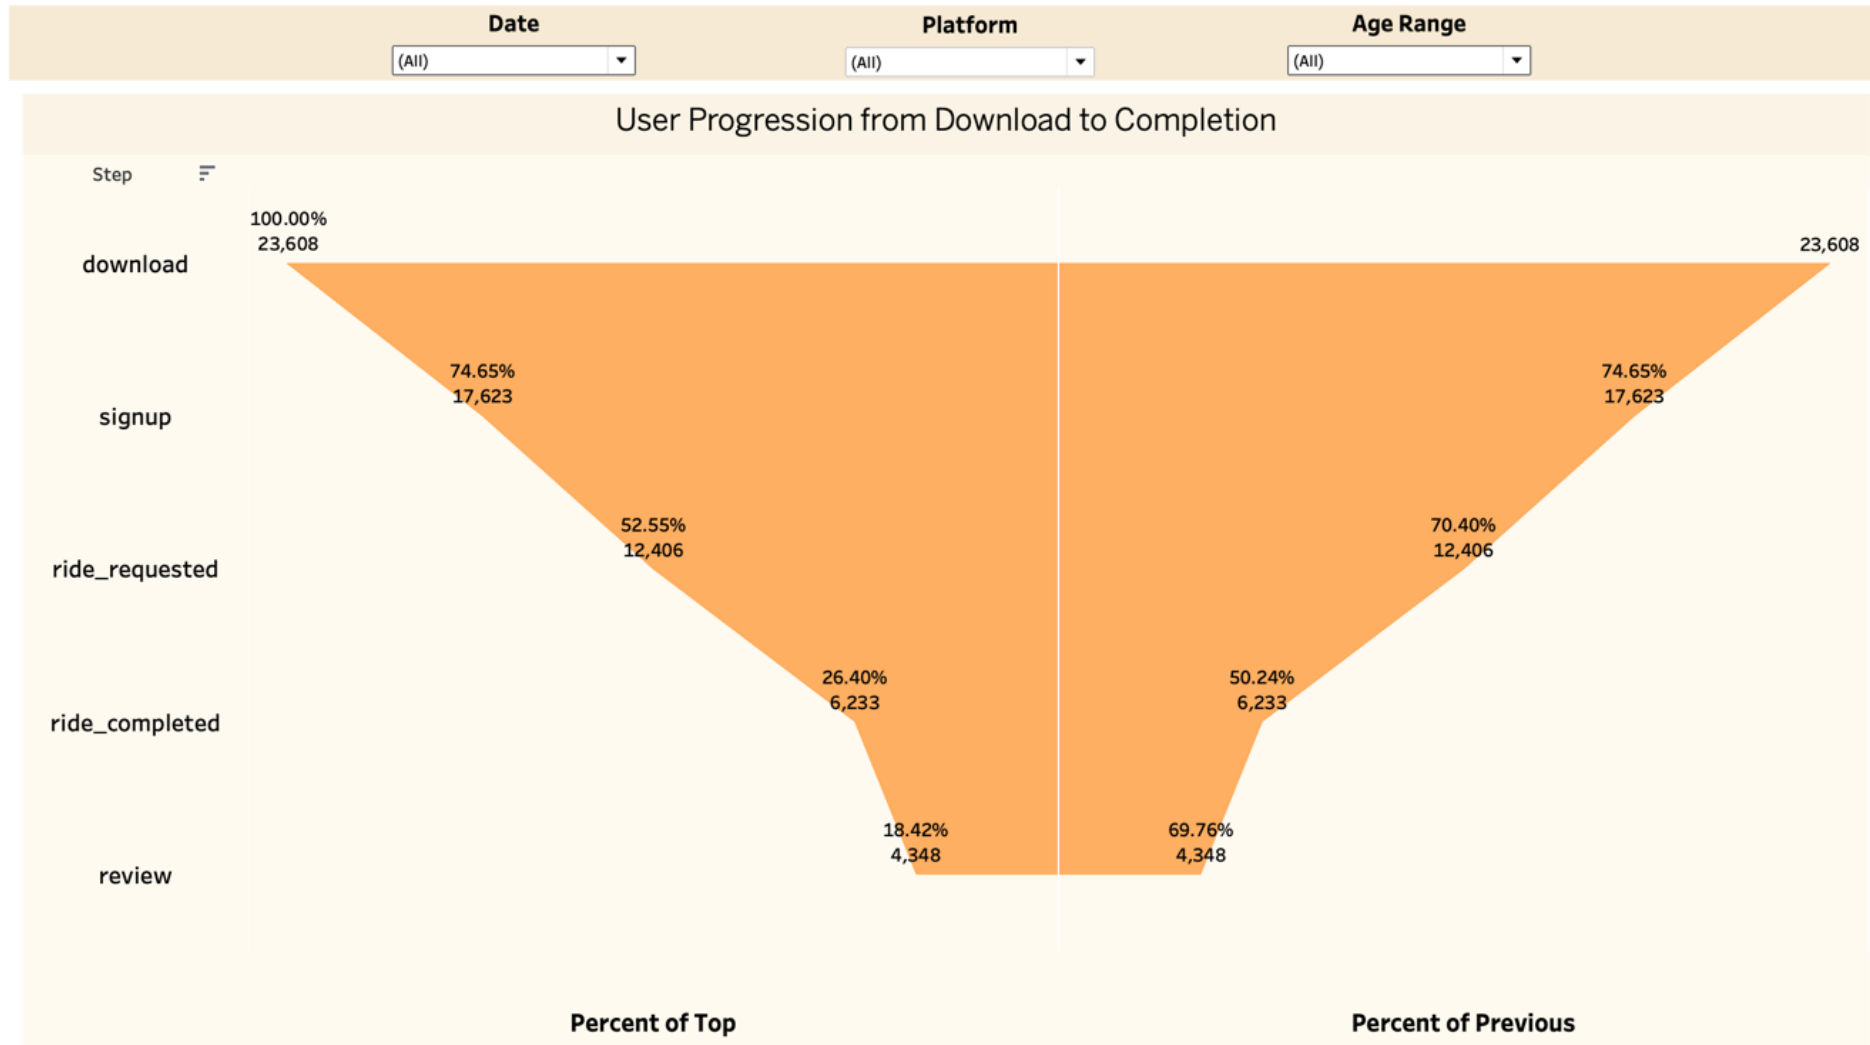

Introduction

- Introducing MetroCar App
- Data Sources and Tables Used
- The Goal of the Project

Funnel Performance

- Customer Funnel Analysis Overview
- Exploring Dynamic Funnel Insights

Recommendations

1) Improve Ride Completion Experience:

- Analyze ride cancellations
- Optimize ride duration/routes
- Streamline payment process
- Personalized promotions
- Real-time customer support

2) Enhance User Onboarding:

- Simplify registration process
- Personalized welcome messages
- Offer signup incentives
- Engaging onboarding tutorials
- User feedback loop

Conclusion

- Data-driven analysis of MetroCar app's user engagement & funnel performance provides valuable insights & recommendations.
- Focus on analyzing ride cancellations, optimizing routes, streamlining payments & providing real-time customer support to enhance user experience & ride completions.
- Improve onboarding with simplified registration, personalized messages, incentives & engaging tutorials to strengthen user base.
- Implementing data-driven decisions will foster growth, boost engagement & maintain a competitive edge.
- The project lays a solid foundation for optimizing user experience, driving meaningful improvements, and ensuring continued success in meeting user expectations.
